

## Sample Course Description

**Faculty: Natural Sciences**

**Study program: Bachelor Biology-Chemistry**

**Course Title: Human Normal Anatomy**

**Course Credits: 5**

**Language of Instruction: Albanian**

### **Course Description**

. The course provides students with the necessary knowledge to know the construction of the human body.

Students will be introduced to the construction of the main systems of the human body: Skeletal system, Muscular system, Digestive system, Circulatory system, Respiratory system, Excretory system, Endocrine system, Reproductive system and Nervous system.

He studies these systems by looking at the structure, the organs that make them up, and the inextricable morphology-function relationship.

### **Course Goals:**

Knowledge of Human Normal Anatomy aims to help the student's general biological formation.

At the same time, these knowledge are the basis for a better understanding of knowledge of the subject of Physiology.

These knowledge are of special interest due to the fact they are related to health.

**Course Requirements:** Attendance: Attendance of lectures by the student is optional.

75% participation in laboratories are mandatory in accordance with the study regulation of study program Biology- Chemistry .

**Grading:** The continuous evaluation during the year is a maximum of 25 points

The exam is evaluated with a maximum of 75 points

The final evaluation of the student is done with a maximum of 100 points in accordance with the regulation of USh "Luigj Gurakuqi"

**Course Schedule:** 3 lessons, 1 laboratory once in two weeks
