Dear readers,

We are happy to announce the BIOSINT project. Through our Newsletters, our website and our social media, we will keep you informed about all the project developments. Stay

MAIN ACTIVITIES AND DELIVERABLES

PROJECT HIGHLIGHTS & MAIN ACTIVITIES (2023–2026)

Building Strong Foundations

The project successfully established a **robust management and quality framework**, ensuring smooth coordination among partners, transparent reporting, and continuous quality monitoring throughout all project phases. Regular consortium meetings and external monitoring strengthened collaboration and accountability.

Research & Needs Analysis

A comprehensive **research and needs analysis** was conducted to map the state of *Internationalization at Home (IaH)* across EU and Western Balkan universities. These insights formed the evidence base for all subsequent developments, ensuring that project solutions were **context-specific, inclusive, and sustainable**.

Developing Systems & Support for IaH

The project designed and implemented **institutional strategies, digital support systems, and operational protocols** to support international students and staff without physical mobility. Pilot services were tested and refined, creating **practical, scalable IaH models** at partner institutions.

Internationalization of the Curriculum

Co-funded by
the European Union

A major achievement was the **integration of international and intercultural dimensions into teaching and learning**.

Key activities included:

- Training academic staff in **Internationalization of the Curriculum (IoC)**
- Introducing **COIL, CLIL, EMI, and virtual teaching models**
- Developing and piloting **international virtual courses**
- Strengthening digital infrastructure through **international virtual classrooms**

These actions brought global perspectives directly into the home curriculum.

Impact, Visibility & Dissemination

Project results were widely shared through **info days, workshops, symposia, conferences, and digital platforms**. Tailored dissemination tools increased visibility among students, academic staff, policymakers, and international stakeholders. Sustainability strategies ensure that project outcomes will **continue beyond the project lifetime**.

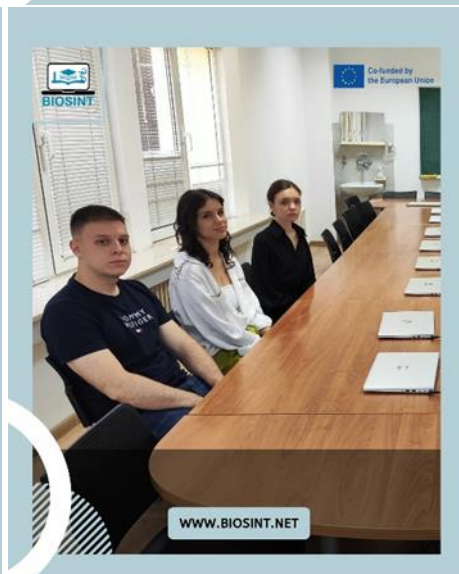

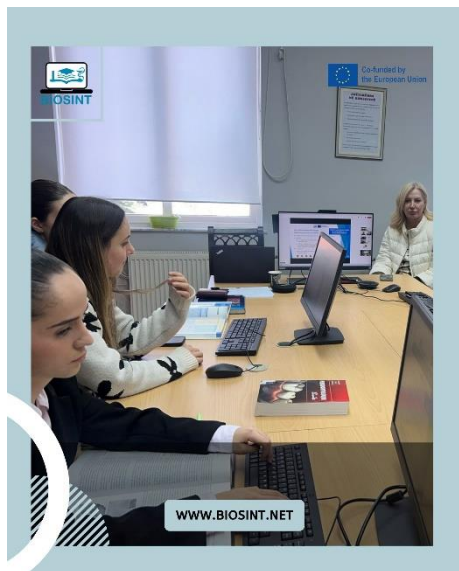

Lasting Impact

By embedding internationalization into everyday academic practice, the project has:

- Expanded **inclusive international learning opportunities**
 - Strengthened **digital and intercultural competences**
 - Enhanced **institutional capacity and resilience**
 - Created a **sustainable Internationalization at Home ecosystem**
-

 **From research to real impact — internationalization made accessible to all.**

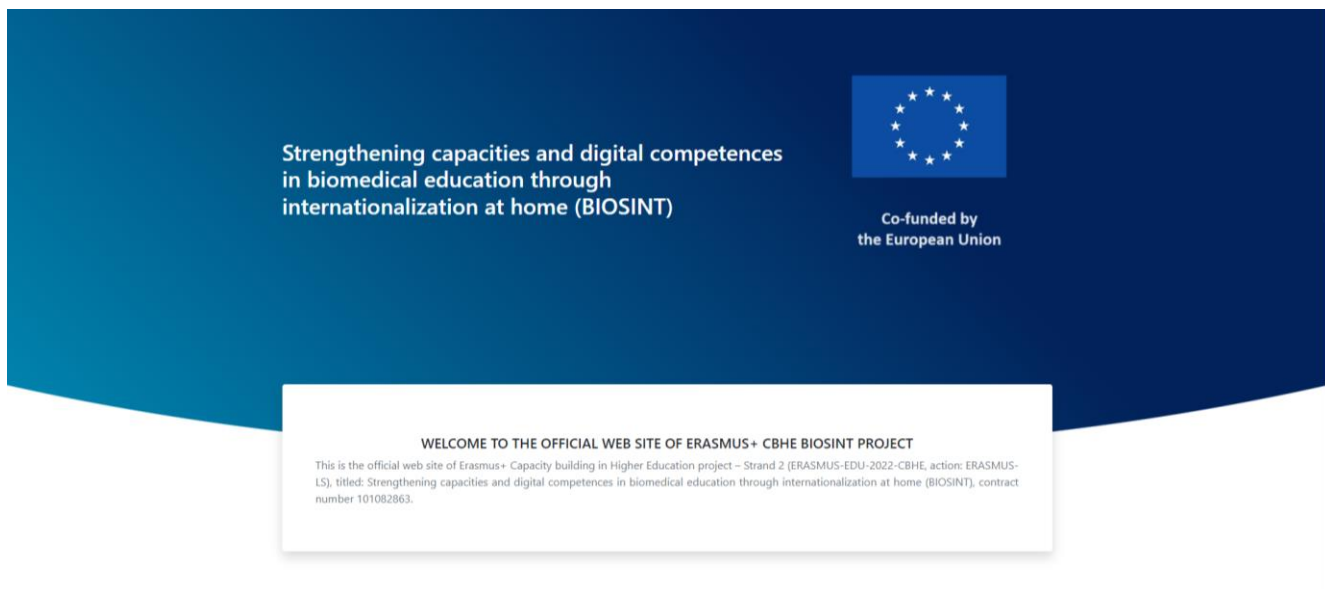

VIRTUAL CLASSROOMS

The BIOSINT website

The BIOSINT project website is on line

The BIOSINT web site is ready for use, not only for the partners but for all the stakeholders or people interested about the intellectual outputs of the project. Our aim is for the project website to be the “information center” for all the announcements, open calls and activities that will take place during and after the realization of the project.
